EDUCATION

2024-08
Master of Science: Cyber Security And Forensics
University of Westminster - United Kingdom

2018-07
Bachelor of Science: Computer Science

DevOps Engineer with 8+ years of cross functional experience spanning DevOps, SRE, DBA, Security and Software Engineering. Skilled in CI/CD (GitLab, GitHub), Kubernetes, IaC (Terraform), Databases and multi cloud (AWS, GCP, Azure) environments. Strong focus on DevSecOps, Cloud Security, Agile delivery and Jira based project tracking. Proven ability to lead, solve complex problems and drive secure, scalable infrastructure solutions.

- <https://github.com/samdhew>

PROFESSIONAL EXPERIENCE

2024-03 -
Current

Senior DevOps Engineer

EV Technologies, Colombo, Sri Lanka

Outsourced Contractor - Sysco LABS, Sri Lanka

- Managing and troubleshooting AWS EKS clusters using GitHub self managed reusable workflows and Helm Charts.
- Installing and troubleshooting Kubernetes.
- Migrating products into AWS and GCP using Terraform and Terragrunt with GitHub Actions.
- Migrating, upgrading and troubleshooting Apache Airflow v1 and v2.
- Automating tasks using Python and Bash.
- Troubleshooting and administrating MongoDB, PostgreSQL and MySQL production level gigabyte size databases.
- Troubleshooting and administrating Linux and Windows servers.
- Setting up alerts and dashboards via AWS CloudWatch and Datadog.

2021-11 -
2024-03

Site Reliability Engineer

Pearson, Colombo, Sri Lanka

- Architecting (AWS: VPC, EC2, ECS, ELB, RDS, Route53 & S3) and creating new environments through Terraform and AWS CloudFormation for migrations.
- Migrating data center Oracle databases to PostgreSQL or AWS Aurora PostgreSQL.

SKILLS

AWS (Amazon Web Services)

GCP (Google Cloud Platform)

CI/CD: GitLab, GitHub & Jenkins

Infrastructure as Code: Terraform

Operating Systems: Linux & Windows

Databases: MSSQL, Oracle, Cassandra, MongoDB & PostgreSQL

Scripting: Bash, Python & PowerShell

Programming Languages: C#

Monitoring: NewRelic, Datadog & Grafana

ITIL

Work Management

Incident Management

Change Management

Leadership

Team Player

- Troubleshooting and administrating MSSQL, Oracle, Cassandra, MongoDB and PostgreSQL production level terabyte size databases.
- Writing composite Terraform modules and customizing them as needed for products to run in GitLab pipelines.
- Automating day to day tasks with Powershell, Bash, Jenkins and Rundeck.
- Identifying and resolving technical issues and design conflicts to minimize project delays and maintain tight schedules.

2021-07 - 2021-11

Associate Site Reliability Engineer
Pearson, Colombo, Sri Lanka

2020-01 - 2021-07

Associate Database Administrator
Pearson, Colombo, Sri Lanka

2019-04 - 2019-12

Security Intern
Pearson, Colombo, Sri Lanka

2017-01 - 2019-03

Software Engineer
Sage Systems (PVT) Ltd, Colombo, Sri Lanka

CERTIFICATES

2024-03	Certified Kubernetes Administrator, Linux Foundation
2022-09	Microsoft Azure Fundamentals, Microsoft
2022-08	HashiCorp Terraform Associate, HashiCorp
2021-05	Google IT Support, Google
2021-01	AWS Associate Solutions Architect, AWS
2019-06	Splunk 7.x Fundamentals Part 1, Splunk

PROJECTS

- **GCP Account Implementation**
Initializing a product in a products' own GCP accounts using composite Terraform modules including Terragrunt and CI/CD (GitHub/Python).
- **AWS Account Segregation**

Logical and Analytical
Approach

Problem Solving

Communication &
Presentation

AWS Services

VPC, Subnets, Route Tables,
IGW, NGW, Route53, WAF,
S3, Athena, EC2, ECS
Fargate, EKS, Security Group,
Application Load Balancer,
Auto Scaling Group, Target
Group, Aurora,
DocumentDB, ElastiCache
Redis/Memcached, DMS,
CloudWatch, CloudFront,
Lambda, SNS

GCP Services

VPC, Subnets, Routes, IGW,
Cloud NAT, Cloud DNS,
Cloud Armor, Cloud
Storage, BigQuery,
Compute Engine, Firewall
Rules, HTTPS Load Balancer,
Managed Instance Groups,
Backend Services, Cloud
SQL, MemoryStore
Redis/Memcached, DMS,
Cloud Monitoring, Cloud
CDN, Cloud Functions,
Pub/Sub

Migrating a product in a common AWS account to product's own AWS accounts using composite Terraform modules including Terragrunt and CI/CD (GitHub/Python). All components of the product were migrated into AWS EKS (Kubernetes on AWS).

- **Apache Airflow**

Migrating and upgrade Apache Airflow cluster from v1 to v2 using composite Terraform modules including Terragrunt and CI/CD (GitHub/Python).

- **AWS Account Segregation**

Migrating multiple products in a common AWS account to products' own AWS accounts using composite Terraform modules and CI/CD (Gitlab/Python). Some products were migrated as it is and few were containerized.

- **Pipeline for Application Deployment (GitLab, Python & Bash)**
- **Pipeline for Infrastructure Deployment (GitLab, Python & Terraform)**
- **Terraform Composite Module Creation (Terraform)**
- **Application on-premise to AWS Migration (AWS: EC2 & ECS Fargate)**
- **Oracle to PostgreSQL Migration (Oracle, PostgreSQL, AWS: RDS, SCT & DMS)**
- **Log4j Patching Automation (Python & Bash)**
- **SQL Server on-premise to AWS Migration (MSSQL, AWS: RDS, SCT & DMS)**
